Professional Summary

Computer Engineering student with experience in data-driven problem solving and project execution complemented by hands-on experience in Machine Learning and Deep Learning. Experiences in managing academic and student-led initiatives, building analytical solutions, and translating complex problems into actionable outcomes.

Education

Thapar Institute Of Engineering and Technology **July 2023 - Present**
B.E Computer Engineering, CGPA : 8.59 *Patiala, Punjab*

MGN Public School **2021 - 2023**
Senior Secondary, XII : 90.2% —| JEE Mains : 93.96 percentile *Jalandhar, Punjab*

Cambridge International School For Girls **2008 - 2021**
High Secondary, X : 94.2% *Jalandhar, Punjab*

Experience

Student Attentiveness Model — Research Intern **June 2025 - August 2025**
National Institute of Technology,Delhi *Delhi*

- Built a real-time student attentiveness detection system using Python and OpenCV, extracting gaze, head-pose, and eye-openness features and training a multiclass Logistic Regression model to classify attentive, distracted, and sleepy states with 89% accuracy.

Road Monitoring System ELC — Research Intern **June 2024 - August 2024**
Thapar Institute of Engineering and Technology *Patiala, Punjab*

- Developed a V2V communication module using a YOLO-based model and Raspberry Pi to detect collisions and low-visibility, broadcasting alerts to nearby vehicles for safer driving with 98% accurate accident and traffic detection.

Leadership & Program Management

Class Representative **August 2024 - Present**

- Coordinating communication between 140+ students and faculty, consolidating concerns, managing multiple student requests & priorities to ensure timely resolution of academic issues.

Executive Member & OEC - Student Alumni Interaction Cell **January 2025 - December 2025**

- Coordinated end-to-end execution of alumni events, managing timelines, responsibilities, communication, resolve execution blockers and ensure timely completion of deliverables.

Design Registration

Secure Biometric USB Drive **January 2025 - March 2025**

- Designed a secure USB drive incorporating fingerprint-based biometric authentication and storage-level monitoring, using AutoCAD. Design registered and published(Application No. 460865-001; Journal No. 16/2026).

Projects

CampusPay: Banking-Based Smart Payment System **January 2025 - May 2025**

- Designed and implemented a database-driven campus payment system using MySQL, supporting wallet management, top-ups, peer-to-peer transfers, and secure transaction tracking. (GitHub)

Bike Sales & Customer Analytics Dashboard **March 2026**

- Cleaned and analyzed customer sales data in Excel, using pivot tables, charts and interactive slicers to identify purchasing patterns across demographic and behavioral segments.(GitHub)

Skills

Languages: Python, C++, C, JavaScript, HTML/CSS
Data & Analytics: SQL, Excel, Google Sheets, Pandas, Numpy
AI/ML: Machine Learning, Deep Learning, Transformers, GANs, CNNs, RNNs, LSTMs, GRUs, Computer Vision
Core CS: Data Structures & Algorithms(70+ problems solved on LeetCode), Object-Oriented Programming, DBMS, OS
Developer Tools: Git, GitHub, VS Code
Others: AutoCAD, Public Speaking, Leadership, Project Planning & Management
